

Upgrading to MIA BUNDLE

from MIA COMPLETE BUNDLE

If you own the old MIA COMPLETE BUNDLE and wish to upgrade to the new MIA BUNDLE, please follow these steps:

Upgrading your licence

1. **Purchase**

- Purchase the licence upgrade from the [MIA BUNDLE UPGRADE](#) page.
- After completing your purchase, you will receive an **activation code** to your email.

2. **Redeem**

- Open the iLok License Manager application and log-in to your account.
- Go to **Licenses > Redeem Activation Code**.
- Enter the activation code and click **Next**.

3. **Surrender**

- Find the MIA BUNDLE (16) license, located under the **Available** tab.
- Select it and **Right Click > Activate**.
- Follow the activation procedure. When prompted, surrender your existing MIA COMPLETE BUNDLE license by clicking **Complete**.

4. **Activate**

- Locate the MIA BUNDLE (16) license under the **Available** tab.
- Activate it on your preferred location: iLok, iLok Cloud, or your host computer.

You have successfully upgraded your licence to the new MIA Bundle. Install the new plugins and enjoy!

For installation instructions and compatibility notes, please see **page 2**.

Installing the new plugins

1. Download

Visit the [MIA BUNDLE](#) page and download the latest MIA Bundle installer.

2. Install

Run the installer and follow the on-screen instructions to complete the installation.

That's it! Your new tools are now ready to use. Enjoy!

Important Notes

Backward compatibility

The new versions include significant changes under the hood and are therefore **not** backwards compatible with previous versions of the same products.

What this means

The new versions can **not** recognize settings from the older versions.

How we mitigate that

- Projects saved with the previous plugin versions **will not** be automatically updated to use the new version. Your work is safe.
- Installing the new versions will **not** overwrite the older ones.
- The new plug-ins can **coexist** with the older versions.

This ensures you can continue working on existing projects, **without losing your settings.**

Plug-in Naming Update

This update also introduces minor changes in the MIA Laboratories plugin naming scheme.

The new versions include spaces in the plugin names and plugin files, for example:

Old name	New name
PiandPhiMkIII	Pi and Phi MkIII
358EnhancerMkII	358 Enhancer MkII

Example of the new plugin naming scheme

Please note

The updated products host a number of significant improvements. Therefore, users are **strongly advised** to upgrade to the new versions as soon as possible.

Installation of the updated Bundle does not overwrite the old plugins, allowing you to migrate to the updated versions **at your own pace**.

We apologize for any inconvenience this may cause and hope this explanation provides clarity. Should you have any questions or need further assistance, please feel free to contact us at support@mialaboratories.com.

May the sound be with you
MIA Laboratories
