

GETTING STARTED

Activation Guide

Install your plugins, activate your licence or start a 14-day trial.

1

Download the installer

Go to mialaboratories.com/downloads, choose your plugin or bundle and click **macOS** or **Windows**. Run the installer and follow the steps.

The same installer works for the trial and the full licence.

2

Install iLok License Manager

MIA plugins are protected by iLok. Download iLok License Manager from ilok.com, install it and create a free iLok account if you do not have one. Then open iLok License Manager and sign in.

3

Activate your licence

Your activation code is in your order confirmation email and in **My Account > Licence keys** on our website.

1. In iLok License Manager, choose **File > Redeem Activation Code**.
2. Enter your code and click **Next**.
3. Choose where to activate: your computer, iLok Cloud or an iLok USB key (2nd generation or later).
4. Click **Activate**. Done.

You can also open the plugin in your DAW and follow the prompt to enter your code there.

Bought from a dealer? If you bought from Thomann, B&H, Best Service, KVR or another dealer, redeem your dealer code at my.pluginiversity.com/redeem first, then follow the steps above.

Or start a 14-day free trial

1. Open the plugin in your DAW.
2. When prompted, choose **Activate Trial**.
3. Sign in with your iLok account. The full plugin runs for 14 days.

The trial is linked to your iLok account, so make sure you are signed in to the account you will use for your licence.

Good to know

Two activations per licence

Use your licence on two computers, or on one computer plus iLok Cloud or an iLok USB key.

Moving to a new computer

In iLok License Manager, deactivate the licence on the old location, then activate it on the new one.

Working offline

Activate on your computer while online. After that the plugin runs without an internet connection.

Free plugins

Thin, Fat, Muscle and Border need no iLok and no activation. Install and play.

System requirements

macOS 10.12 or later, Intel and Apple Silicon.
Windows 7 or later, 64-bit. AAX, AU and VST3.

Plugin not showing in your DAW?

Rescan your plugins in the DAW, and check that you installed the version for your system.
